Study report for *User Story Mapping* by Jeff Patton (Beginner level) mapped to the Business Analyst role. Visual backlog design and release planning with user stories.

Chapters

Track: Book-Intro

Chapter 1: About User Story Mapping [Beginner]

Chapter focus: About User Story Mapping** *(Level: Beginner)

This study report summarizes *User Story Mapping* by Jeff Patton for the Business Analyst role. The resource is rated Beginner level. Visual backlog design and release planning with user stories. Use this report alongside the official material to prepare for CodeQuest review.

Code Reference:

```
# User Story Mapping
# Author: Jeff Patton
# Role: Business Analyst
# Level: Beginner
```

What it shows: Metadata block records the source book and target role family.

Topic guide

What it actually is

A structured study report based on User Story Mapping.

When to use it

When learning Business Analyst skills at Beginner level.

Where to use it

Business Analyst training paths and certification prep.

Real use example

A learner reads this report before starting the full book or free online guide.

Track: Book-Context

Chapter 2: Why This Book Matters for Your Role [Beginner]

Chapter focus: Why This Book Matters for Your Role *(Level: Beginner)**

Business Analyst professionals use ideas from User Story Mapping to solve real workplace problems. Visual backlog design and release planning with user stories. This chapter explains how the book fits into your learning path and what you should be able to do after studying it.

Code Reference:

Role: Business Analyst

Book focus: Visual backlog design and release planning with user stories.

Recommended level: Beginner

What it shows: Connects the book topic to the job role outcomes.

Topic guide

What it actually is

Role-aligned learning connects theory to job tasks.

When to use it

During career planning and syllabus design.

Where to use it

Business Analyst bootcamps and CodeQuest teacher assignments.

Real use example

A teacher assigns this book report before a beginner skills checkpoint.

Track: Book-Topics

Chapter 3: Key Topics Covered [Beginner]

Chapter focus: Key Topics Covered *(Level: Beginner)**

The main topics in User Story Mapping include practical concepts described as: Visual backlog design and release planning with user stories. Study each topic with hands-on practice. Take notes on definitions, workflows, and examples that match tools used in Business Analyst jobs today.

Code Reference:

- Topic 1: core concept
- Topic 2: core concept
- Topic 3: core concept
- Topic 4: core concept

What it shows: Topic list guides what to study chapter-by-chapter in the source.

Topic guide

What it actually is

Topic maps turn a book into actionable learning objectives.

When to use it

Before reading and while building chapter summaries.

Where to use it

Self-study, flipped classroom, and revision.

Real use example

A student maps each book chapter to a CodeQuest report section.

Track: Book-Applied

Chapter 4: Applied: Business Analyst Role and BABOK Overview [Beginner]

Chapter focus: Business Analyst Role and BABOK Overview** *(Level: Beginner)

Business analysts bridge business problems and technical solutions. BABOK v3 defines six knowledge areas: planning, elicitation, requirements life cycle, strategy analysis, design definition, and solution evaluation. BAs facilitate—they rarely dictate. Success is measured by delivered outcomes and stakeholder satisfaction, not document page count.

Code Reference:

```
# BABOK knowledge areas
areas = ['Planning', 'Elicitation', 'Requirements', 'Strategy',
        'Design', 'Evaluation']
```

What it shows: Listing BABOK areas frames your study plan for IIBA certifications.

Topic guide

What it actually is

A business analyst clarifies needs and translates them into actionable requirements.

When to use it

New product features, process improvements, and system replacements.

Where to use it

Software teams, banks, healthcare IT, and public-sector digital services.

Real use example

CodeQuest hires a BA to interview instructors about grading pain before developers write code.

Chapter 5: Applied: Stakeholder Identification and RACI [Beginner]

Chapter focus: Stakeholder Identification and RACI *(Level: Beginner)**

Map stakeholders by influence and interest. RACI charts assign Responsible, Accountable, Consulted, and Informed roles per deliverable. Executive sponsors need concise updates; end users need empathy and jargon-free language. Maintain a stakeholder register with communication preferences.

Code Reference:

```
stakeholders = {  
  'Product Owner': 'Accountable',  
  'Lead Teacher': 'Consulted',  
  'Dev Team': 'Responsible',  
  'Compliance': 'Informed'  
}
```

What it shows: RACI dictionaries prevent approval bottlenecks during delivery.

Topic guide

What it actually is

Stakeholder analysis ensures the right voices are heard at the right time.

When to use it

Project kickoff and whenever scope or org changes.

Where to use it

Cross-functional Agile squads and PMO-led programs.

Real use example

RACI clarifies who approves scope changes when legal must be Consulted on student data features.

Chapter 6: Applied: Elicitation Techniques [Beginner]

Chapter focus: Elicitation Techniques *(Level: Beginner)**

Techniques include interviews, workshops, observation, document analysis, prototyping, and surveys. Combine methods-workshops surface alignment; interviews reveal nuance. Prepare

open-ended questions, paraphrase answers, and validate with 'Did I understand correctly?'

Code Reference:

```
questions = [  
    'What triggers this process today?',  
    'What breaks most often?',  
    'How do you measure success?'  
]
```

What it shows: Open questions uncover root needs instead of confirming biases.

Topic guide

What it actually is

Elicitation gathers tacit and explicit business knowledge.

When to use it

Discovery phases before committing to solutions.

Where to use it

Any project with human workflows and policy constraints.

Real use example

Workshop reveals teachers export CSV manually weekly-hidden step never in original RFP.

Track: Book-Plan

Chapter 7: Study Plan and Practice [Beginner]

Chapter focus: Study Plan and Practice *(Level: Beginner)**

Finish User Story Mapping with a weekly plan: read one section, write a summary, complete one exercise, and reflect on how it applies to Business Analyst. If a free edition exists, practice every example. Submit your notes and one mini-project demo for teacher review.

Code Reference:

```
Week 1: Read + notes  
Week 2: Exercises  
Week 3: Mini project  
Week 4: Review + quiz
```

What it shows: A 4-week plan turns reading into demonstrable skill.

Topic guide

What it actually is

Structured study plans improve retention and portfolio outcomes.

When to use it

After finishing the key topics chapters.

Where to use it

CodeQuest end-of-unit assessments.

Real use example

A learner completes the study plan and uploads a beginner project screenshot.
