

Project Report: CodeQuest Admin Power Platform Suite - Microsoft Power Platform Developer

Written by Gagan Pasupuleti

Family:	Microsoft Power Platform Developer
Level:	Advanced
Chapters:	6
Source:	CodeQuest project specification (official docs + industry patterns)

Summary

Model-driven app + embedded Power BI + ALM across environments for school admin reporting.

Chapters

Track: Project-Intro

Chapter 1: Project Overview [Advanced]

Chapter focus: Project Overview** *(Level: Advanced)

CodeQuest Admin Power Platform Suite** is a advanced-level end-to-end project for Microsoft Power Platform Developer. Duration: 4-5 weeks. Model-driven app + embedded Power BI + ALM across environments for school admin reporting. Tools: Power Apps, Power BI, Dataverse, Solutions.

Code Reference:

Objective: Model-driven app for student/report management
Objective: Embedded Power BI class performance tile
Objective: Solution ALM dev ? test ? prod
Objective: Security roles for admin and teacher

What it shows: Lists measurable outcomes before you start building.

Topic guide

What it actually is

A project overview defines scope, tools, and success criteria.

When to use it

At project kickoff.

Where to use it

Microsoft Power Platform Developer portfolios and CodeQuest project submissions.

Real use example

A candidate lists this project on a Microsoft Power Platform Developer resume with a demo link.

Track: Project-Phase

Chapter 2: Phase: Model App [Advanced]

Chapter focus: Phase: Model App *(Level: Advanced)**

Dataverse tables. Complete these tasks: Students; Reports; Marks. Deliverable for this phase: Model app published.

Code Reference:

- [] Students
- [] Reports
- [] Marks

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Model App is one step in the full project lifecycle.

When to use it

During week 1 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Model app published to the teacher.

Chapter 3: Phase: BI Embed [Advanced]

Chapter focus: Phase: BI Embed *(Level: Advanced)**

Power BI in app. Complete these tasks: Class avg tile; Drill-through. Deliverable for this phase: Embedded BI screenshot.

Code Reference:

- [] Class avg tile
- [] Drill-through

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase BI Embed is one step in the full project lifecycle.

When to use it

During week 2 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Embedded BI screenshot to the teacher.

Chapter 4: Phase: ALM [Advanced]**Chapter focus: Phase: ALM** *(Level: Advanced)**

Solution pipeline. Complete these tasks: Unmanaged dev; Managed prod. Deliverable for this phase: ALM documentation.

Code Reference:

- [] Unmanaged dev
- [] Managed prod

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase ALM is one step in the full project lifecycle.

When to use it

During week 3 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the ALM documentation to the teacher.

Chapter 5: Phase: Security [Advanced]**Chapter focus: Phase: Security** *(Level: Advanced)**

Role definitions. Complete these tasks: Admin full; Teacher limited. Deliverable for this phase: Security test results.

Code Reference:

- [] Admin full
- [] Teacher limited

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Security is one step in the full project lifecycle.

When to use it

During week 4 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Security test results to the teacher.

Track: Project-Deliverables

Chapter 6: Final Deliverables and Review [Advanced]

Chapter focus: Final Deliverables and Review** *(Level: Advanced)

Submit all final deliverables: Published app; BI dashboard embed; ALM doc; Security matrix. Skills demonstrated: Model-driven apps, Power BI, ALM. Prepare a 5-minute walkthrough video and README for CodeQuest teacher marking.

Code Reference:

```
Deliverable: Published app
Deliverable: BI dashboard embed
Deliverable: ALM doc
Deliverable: Security matrix
```

What it shows: Final checklist ensures nothing is missing at submission.

Topic guide

What it actually is

Deliverable review confirms end-to-end project completion.

When to use it

Before deadline and teacher review.

Where to use it

CodeQuest project gallery and interviews.

Real use example

A student submits Published app and passes the rubric.
