

Project Report: Multi-Source Finance Model - Power BI Analyst

Written by Gagan Pasupuleti

Family:	Power BI Analyst
Level:	Intermediate
Chapters:	6
Source:	CodeQuest project specification (official docs + industry patterns)

Summary

Merge SQL Server + Excel + API data; complex DAX time intelligence; row-level security by department.

Chapters

Track: Project-Intro

Chapter 1: Project Overview [Intermediate]

Chapter focus: Project Overview** *(Level: Intermediate)

Multi-Source Finance Model** is a intermediate-level end-to-end project for Power BI Analyst. **Duration:** 3-4 weeks. Merge SQL Server + Excel + API data; complex DAX time intelligence; row-level security by department. **Tools:** Power BI, DAX Studio, SQL Server.

Code Reference:

Objective: Merge 3 data sources in Power Query
Objective: Implement RLS by department
Objective: YTD/QoQ DAX measures
Objective: Performance tune with DAX Studio

What it shows: Lists measurable outcomes before you start building.

Topic guide

What it actually is

A project overview defines scope, tools, and success criteria.

When to use it

At project kickoff.

Where to use it

Power BI Analyst portfolios and CodeQuest project submissions.

Real use example

A candidate lists this project on a Power BI Analyst resume with a demo link.

Track: Project-Phase

Chapter 2: Phase: ETL [Intermediate]

Chapter focus: Phase: ETL *(Level: Intermediate)**

Power Query merge queries. Complete these tasks: API connector; SQL direct query. Deliverable for this phase: Combined dataset.

Code Reference:

- [] API connector
- [] SQL direct query

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase ETL is one step in the full project lifecycle.

When to use it

During week 1 of the project timeline.

Where to use it

Power BI Analyst agile sprints and coursework milestones.

Real use example

Team demo shows the Combined dataset to the teacher.

Chapter 3: Phase: RLS [Intermediate]

Chapter focus: Phase: RLS *(Level: Intermediate)**

Department filter roles. Complete these tasks: DAX USERPRINCIPALNAME; Test roles. Deliverable for this phase: RLS test matrix.

Code Reference:

- [] DAX USERPRINCIPALNAME
- [] Test roles

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase RLS is one step in the full project lifecycle.

When to use it

During week 2 of the project timeline.

Where to use it

Power BI Analyst agile sprints and coursework milestones.

Real use example

Team demo shows the RLS test matrix to the teacher.

Chapter 4: Phase: Time Intel [Intermediate]**Chapter focus: Phase: Time Intel** *(Level: Intermediate)**

YTD, YoY, rolling averages. Complete these tasks: DATEADD; SAMEPERIODLASTYEAR.
Deliverable for this phase: Finance KPI page.

Code Reference:

- [] DATEADD
- [] SAMEPERIODLASTYEAR

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase Time Intel is one step in the full project lifecycle.

When to use it

During week 3 of the project timeline.

Where to use it

Power BI Analyst agile sprints and coursework milestones.

Real use example

Team demo shows the Finance KPI page to the teacher.

Chapter 5: Phase: Tune [Intermediate]**Chapter focus: Phase: Tune** *(Level: Intermediate)**

DAX Studio query plans. Complete these tasks: Remove iterators; Variables. Deliverable for this phase: Before/after perf screenshot.

Code Reference:

- [] Remove iterators
- [] Variables

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Tune is one step in the full project lifecycle.

When to use it

During week 4 of the project timeline.

Where to use it

Power BI Analyst agile sprints and coursework milestones.

Real use example

Team demo shows the Before/after perf screenshot to the teacher.

Track: Project-Deliverables

Chapter 6: Final Deliverables and Review [Intermediate]

Chapter focus: Final Deliverables and Review** *(Level: Intermediate)

Submit all final deliverables: PBIX; RLS documentation; Performance comparison; User guide.
Skills demonstrated: Power Query, DAX, RLS, Performance. Prepare a 5-minute walkthrough video and README for CodeQuest teacher marking.

Code Reference:

```
Deliverable: PBIX
Deliverable: RLS documentation
Deliverable: Performance comparison
Deliverable: User guide
```

What it shows: Final checklist ensures nothing is missing at submission.

Topic guide

What it actually is

Deliverable review confirms end-to-end project completion.

When to use it

Before deadline and teacher review.

Where to use it

CodeQuest project gallery and interviews.

Real use example

A student submits PBIX and passes the rubric.
