

Project Report: LWC Custom Component Suite - Salesforce CRM Developer / Administrator

Written by Gagan Pasupuleti

Family:	Salesforce CRM Developer / Administrator
Level:	Advanced
Chapters:	6
Source:	CodeQuest project specification (official docs + industry patterns)

Summary

Build 3 Lightning Web Components with Apex controllers, Jest tests, and deploy via Salesforce CLI.

Chapters

Track: Project-Intro

Chapter 1: Project Overview [Advanced]

Chapter focus: Project Overview *(Level: Advanced)**

LWC Custom Component Suite is a advanced-level end-to-end project for Salesforce CRM Developer / Administrator. Duration: 4-5 weeks. Build 3 Lightning Web Components with Apex controllers, Jest tests, and deploy via Salesforce CLI. Tools: Salesforce CLI, LWC, Apex, Jest.**

Code Reference:

Objective: 3 LWC components (lookup, datatable, chart)
Objective: Apex controllers with SOQL
Objective: Jest unit tests
Objective: CI deploy with sf CLI

What it shows: Lists measurable outcomes before you start building.

Topic guide

What it actually is

A project overview defines scope, tools, and success criteria.

When to use it

At project kickoff.

Where to use it

Salesforce CRM Developer / Administrator portfolios and CodeQuest project submissions.

Real use example

A candidate lists this project on a Salesforce CRM Developer / Administrator resume with a demo link.

Track: Project-Phase

Chapter 2: Phase: LWC [Advanced]

Chapter focus: Phase: LWC *(Level: Advanced)**

Build 3 components. Complete these tasks: lookupSearch; dataTable; chartWidget. Deliverable for this phase: Components in org.

Code Reference:

- [] lookupSearch
- [] dataTable
- [] chartWidget

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase LWC is one step in the full project lifecycle.

When to use it

During week 1 of the project timeline.

Where to use it

Salesforce CRM Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Components in org to the teacher.

Chapter 3: Phase: Apex [Advanced]

Chapter focus: Phase: Apex *(Level: Advanced)**

Controllers + tests. Complete these tasks: @AuraEnabled; Test classes 75%+. Deliverable for this phase: Apex test results.

Code Reference:

- [] @AuraEnabled
- [] Test classes 75%+

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Apex is one step in the full project lifecycle.

When to use it

During week 2 of the project timeline.

Where to use it

Salesforce CRM Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Apex test results to the teacher.

Chapter 4: Phase: Jest [Advanced]

Chapter focus: Phase: Jest** *(Level: Advanced)

LWC Jest tests. Complete these tasks: Mock data; Event tests. Deliverable for this phase: Jest coverage report.

Code Reference:

- [] Mock data
- [] Event tests

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Jest is one step in the full project lifecycle.

When to use it

During week 3 of the project timeline.

Where to use it

Salesforce CRM Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Jest coverage report to the teacher.

Chapter 5: Phase: CI [Advanced]

Chapter focus: Phase: CI** *(Level: Advanced)

GitHub Actions deploy. Complete these tasks: sf project deploy; Scratch org test. Deliverable for this phase: CI pipeline green.

Code Reference:

- [] sf project deploy

- [] Scratch org test

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase CI is one step in the full project lifecycle.

When to use it

During week 4 of the project timeline.

Where to use it

Salesforce CRM Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the CI pipeline green to the teacher.

Track: Project-Deliverables

Chapter 6: Final Deliverables and Review [Advanced]

Chapter focus: Final Deliverables and Review** *(Level: Advanced)

Submit all final deliverables: GitHub repo; Deployed components; Test reports; CI pipeline. Skills demonstrated: LWC, Apex, CI/CD. Prepare a 5-minute walkthrough video and README for CodeQuest teacher marking.

Code Reference:

Deliverable: GitHub repo
Deliverable: Deployed components
Deliverable: Test reports
Deliverable: CI pipeline

What it shows: Final checklist ensures nothing is missing at submission.

Topic guide

What it actually is

Deliverable review confirms end-to-end project completion.

When to use it

Before deadline and teacher review.

Where to use it

CodeQuest project gallery and interviews.

Real use example

A student submits GitHub repo and passes the rubric.
