Topic guide

What it actually is

A structured study report based on ServiceNow IT Operations Management.

When to use it

When learning ServiceNow Developer / Administrator skills at Advanced level.

Where to use it

ServiceNow Developer / Administrator training paths and certification prep.

Real use example

A learner reads this report before starting the full book or free online guide.

Track: Book-Context

Chapter 2: Why This Book Matters for Your Role [Advanced]

Chapter focus: Why This Book Matters for Your Role** *(Level: Advanced)

ServiceNow Developer / Administrator professionals use ideas from ServiceNow IT Operations Management to solve real workplace problems. Event management, discovery, and operational workflows. This chapter explains how the book fits into your learning path and what you should be able to do after studying it.

Code Reference:

Role: ServiceNow Developer / Administrator

Book focus: Event management, discovery, and operational workflows.

Recommended level: Advanced

What it shows: Connects the book topic to the job role outcomes.

Topic guide

What it actually is

Role-aligned learning connects theory to job tasks.

When to use it

During career planning and syllabus design.

Where to use it

ServiceNow Developer / Administrator bootcamps and CodeQuest teacher assignments.

Real use example

A teacher assigns this book report before a advanced skills checkpoint.

Track: Book-Topics

Chapter 3: Key Topics Covered [Advanced]

Chapter focus: Key Topics Covered** *(Level: Advanced)

The main topics in ServiceNow IT Operations Management include practical concepts described as: Event management, discovery, and operational workflows. Study each topic with hands-on practice. Take notes on definitions, workflows, and examples that match tools used in ServiceNow Developer / Administrator jobs today.

Code Reference:

- Topic 1: core concept
- Topic 2: core concept
- Topic 3: core concept
- Topic 4: core concept

What it shows: Topic list guides what to study chapter-by-chapter in the source.

Topic guide

What it actually is

Topic maps turn a book into actionable learning objectives.

When to use it

Before reading and while building chapter summaries.

Where to use it

Self-study, flipped classroom, and revision.

Real use example

A student maps each book chapter to a CodeQuest report section.

Track: Book-Applied

Chapter 4: Applied: Scoped Application Development [Advanced]

Chapter focus: Scoped Application Development** *(Level: Advanced)

Scoped applications isolate code and data with application-specific tables and ACLs. Use ServiceNow Studio, application files, and ATF tests. Script Includes encapsulate reusable logic. Follow ServiceNow JavaScript APIs-avoid unsupported DOM hacks.

Code Reference:

```
var AssetUtils = Class.create();
AssetUtils.prototype = Object.extend(Object(global.AbstractAjaxProcessor, {
  process: function() { return this.getParameter('sysparm_query'); }
}));
```

What it shows: Script Includes extend AbstractAjaxProcessor for GlideAjax endpoints.

Topic guide

What it actually is

Scoped apps package maintainable custom solutions on the platform.

When to use it

ISVs, internal platform teams, and complex custom processes.

Where to use it

Custom vendor management app with own tables, modules, and portal.

Real use example

CodeQuest capstone ships scoped inventory app through store-ready checklist and ATF suite.

Chapter 5: Applied: Performance and GlideAggregate Optimization [Advanced]

Chapter focus: Performance and GlideAggregate Optimization** *(Level: Advanced)

Slow queries hurt UX and batch jobs. Use indexes, avoid dot-walking in large loops, prefer GlideAggregate to manual counting. Enable Debug Business Rule and SQL explain plans in non-prod. Partition long-running jobs with setLimit and resume markers.

Code Reference:

```
var ga = new GlideAggregate('task');
ga.addAggregate('COUNT');
ga.addQuery('assignment_group', groupId);
ga.setGroup(false);
ga.query();
var count = ga.next() ? ga.getAggregate('COUNT') : 0;
```

What it shows: Aggregate queries replace thousands of getRowCount loops.

Topic guide

What it actually is

Performance tuning keeps instances responsive at enterprise scale.

When to use it

Instances exceeding millions of task rows or heavy integrations.

Where to use it

Global enterprises and high-volume MSP instances.

Real use example

Dashboard widget refactored from GlideRecord loop to GlideAggregate-load time drops 18s to 0.4s.

Chapter 6: Applied: Scripted REST APIs and OAuth [Advanced]

Chapter focus: Scripted REST APIs and OAuth** *(Level: Advanced)

Scripted REST APIs expose custom endpoints with scripted processing and ACL enforcement. Define resources, HTTP verbs, and API security profiles. OAuth 2.0 and JWT bearer tokens gate access for mobile apps and external dashboards.

Code Reference:

```
(function process(/*RESTAPIRequest*/ request, /*RESTAPIResponse*/ response) {  
    var body = request.body.dataString;  
    response.setStatus(200);  
    response.setBody({status: 'ok'});  
})(request, response);
```

What it shows: Scripted REST handlers validate payloads and return JSON responses.

Topic guide

What it actually is

Scripted REST enables platform-as-backend for custom experiences.

When to use it

Mobile apps, partner portals, and machine-to-machine automation.

Where to use it

Secure external integrations without sharing user credentials.

Real use example

CodeQuest mobile app fetches open incidents via OAuth-secured Scripted REST for student interns.

Track: Book-Plan

Chapter 7: Study Plan and Practice [Advanced]

Chapter focus: Study Plan and Practice** *(Level: Advanced)

Finish ServiceNow IT Operations Management with a weekly plan: read one section, write a summary, complete one exercise, and reflect on how it applies to ServiceNow Developer / Administrator. If a free edition exists, practice every example. Submit your notes and one mini-project demo for teacher review.

Code Reference:

```
Week 1: Read + notes  
Week 2: Exercises  
Week 3: Mini project  
Week 4: Review + quiz
```

What it shows: A 4-week plan turns reading into demonstrable skill.

Topic guide

What it actually is

Structured study plans improve retention and portfolio outcomes.

When to use it

After finishing the key topics chapters.

Where to use it

CodeQuest end-of-unit assessments.

Real use example

A learner completes the study plan and uploads a advanced project screenshot.
