

Project Report: CMDB + Event Management Integration - ServiceNow Developer / Administrator

Written by Gagan Pasupuleti

Family:	ServiceNow Developer / Administrator
Level:	Advanced
Chapters:	6
Source:	CodeQuest project specification (official docs + industry patterns)

Summary

Populate CMDB with server CIs, integrate monitoring alerts to auto-create incidents with enrichment.

Chapters

Track: Project-Intro

Chapter 1: Project Overview [Advanced]

Chapter focus: Project Overview (Level: Advanced)**

CMDB + Event Management Integration** is a advanced-level end-to-end project for ServiceNow Developer / Administrator. Duration: 4-5 weeks. Populate CMDB with server CIs, integrate monitoring alerts to auto-create incidents with enrichment. Tools: ServiceNow PDI, CMDB, Integration Hub.

Code Reference:

Objective: CMDB CI classes and relationships
Objective: Discovery or manual CI import
Objective: Event rules for alert ? incident
Objective: CI impact analysis on changes

What it shows: Lists measurable outcomes before you start building.

Topic guide

What it actually is

A project overview defines scope, tools, and success criteria.

When to use it

At project kickoff.

Where to use it

ServiceNow Developer / Administrator portfolios and CodeQuest project submissions.

Real use example

A candidate lists this project on a ServiceNow Developer / Administrator resume with a demo link.

Track: Project-Phase

Chapter 2: Phase: CMDB [Advanced]

Chapter focus: Phase: CMDB** *(Level: Advanced)

CI model setup. Complete these tasks: Server class; Relationships. Deliverable for this phase: CMDB populated.

Code Reference:

- [] Server class
- [] Relationships

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase CMDB is one step in the full project lifecycle.

When to use it

During week 1 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the CMDB populated to the teacher.

Chapter 3: Phase: Discovery [Advanced]

Chapter focus: Phase: Discovery** *(Level: Advanced)

Import/discover CIs. Complete these tasks: CSV import; Relationship map. Deliverable for this phase: CMDB diagram.

Code Reference:

- [] CSV import
- [] Relationship map

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Discovery is one step in the full project lifecycle.

When to use it

During week 2 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the CMDB diagram to the teacher.

Chapter 4: Phase: Events [Advanced]

Chapter focus: Phase: Events *(Level: Advanced)**

Alert integration. Complete these tasks: Event rules; Severity mapping. Deliverable for this phase: Auto-incident demo.

Code Reference:

- [] Event rules
- [] Severity mapping

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase Events is one step in the full project lifecycle.

When to use it

During week 3 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Auto-incident demo to the teacher.

Chapter 5: Phase: Impact [Advanced]

Chapter focus: Phase: Impact *(Level: Advanced)**

Change impact check. Complete these tasks: Affected CIs; Business services. Deliverable for this phase: Impact analysis report.

Code Reference:

- [] Affected CIs
- [] Business services

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Impact is one step in the full project lifecycle.

When to use it

During week 4 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Impact analysis report to the teacher.

Track: Project-Deliverables

Chapter 6: Final Deliverables and Review [Advanced]

Chapter focus: Final Deliverables and Review** *(Level: Advanced)

Submit all final deliverables: CMDB export; Event rule config; Impact analysis demo; Architecture doc. Skills demonstrated: CMDB, Event Management, Integration. Prepare a 5-minute walkthrough video and README for CodeQuest teacher marking.

Code Reference:

```
Deliverable: CMDB export
Deliverable: Event rule config
Deliverable: Impact analysis demo
Deliverable: Architecture doc
```

What it shows: Final checklist ensures nothing is missing at submission.

Topic guide

What it actually is

Deliverable review confirms end-to-end project completion.

When to use it

Before deadline and teacher review.

Where to use it

CodeQuest project gallery and interviews.

Real use example

A student submits CMDB export and passes the rubric.
