Makers often start with SharePoint lists and Excel tables in OneDrive. Know column types, choice columns, and permissions inheritance. Migrate to Dataverse when needing relational model, security roles, or ALM.

Code Reference:

```
# SharePoint list: Inspections | Columns: Title, DeviceId, Photo, Score, InspectorEmail
```

What it shows: List schema comments guide citizen developer setup.

Topic guide

What it actually is

SharePoint is the quickest citizen-developer data store.

When to use it

Team-level apps before enterprise ALM investment.

Where to use it

Departments already on Microsoft 365.

Real use example

HR attendance list backs canvas app until row count triggers Dataverse migration.

Track: Book-Plan

Chapter 7: Study Plan and Practice [Beginner]

Chapter focus: Study Plan and Practice** *(Level: Beginner)

Finish Beginning Power Apps with a weekly plan: read one section, write a summary, complete one exercise, and reflect on how it applies to Microsoft Power Platform Developer. If a free edition exists, practice every example. Submit your notes and one mini-project demo for teacher review.
