

Project Report: Approval Workflow with Power Automate - Microsoft Power Platform Developer

Written by Gagan Pasupuleti

Family:	Microsoft Power Platform Developer
Level:	Intermediate
Chapters:	6
Source:	CodeQuest project specification (official docs + industry patterns)

Summary

Purchase request app + automated approval flow with Teams adaptive cards and Dataverse audit log.

Chapters

Track: Project-Intro

Chapter 1: Project Overview [Intermediate]

Chapter focus: Project Overview *(Level: Intermediate)**

Approval Workflow with Power Automate** is a intermediate-level end-to-end project for Microsoft Power Platform Developer. Duration: 2-3 weeks. Purchase request app + automated approval flow with Teams adaptive cards and Dataverse audit log. Tools: Power Apps, Power Automate, Dataverse, Teams.

Code Reference:

Objective: Canvas app for purchase requests
Objective: Automated approval flow with conditions
Objective: Teams adaptive card notification
Objective: Dataverse table for audit trail

What it shows: Lists measurable outcomes before you start building.

Topic guide

What it actually is

A project overview defines scope, tools, and success criteria.

When to use it

At project kickoff.

Where to use it

Microsoft Power Platform Developer portfolios and CodeQuest project submissions.

Real use example

A candidate lists this project on a Microsoft Power Platform Developer resume with a demo link.

Track: Project-Phase

Chapter 2: Phase: App [Intermediate]

Chapter focus: Phase: App *(Level: Intermediate)**

Request form. Complete these tasks: Amount; Category; Justification. Deliverable for this phase: Canvas app.

Code Reference:

- ☐ Amount
- ☐ Category
- ☐ Justification

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase App is one step in the full project lifecycle.

When to use it

During week 1 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Canvas app to the teacher.

Chapter 3: Phase: Flow [Intermediate]

Chapter focus: Phase: Flow *(Level: Intermediate)**

Approval logic. Complete these tasks: Manager if >\$500; Finance if >\$5000. Deliverable for this phase: Flow diagram export.

Code Reference:

- ☐ Manager if >\$500
- ☐ Finance if >\$5000

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Flow is one step in the full project lifecycle.

When to use it

During week 2 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Flow diagram export to the teacher.

Chapter 4: Phase: Teams [Intermediate]

Chapter focus: Phase: Teams** *(Level: Intermediate)

Adaptive card. Complete these tasks: Approve/Reject buttons; Comments. Deliverable for this phase: Teams notification screenshot.

Code Reference:

- [] Approve/Reject buttons
- [] Comments

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Teams is one step in the full project lifecycle.

When to use it

During week 3 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Teams notification screenshot to the teacher.

Chapter 5: Phase: Audit [Intermediate]

Chapter focus: Phase: Audit** *(Level: Intermediate)

Dataverse log table. Complete these tasks: Request ID; Decision; Timestamp. Deliverable for this phase: Audit report view.

Code Reference:

- [] Request ID

- [] Decision
- [] Timestamp

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Audit is one step in the full project lifecycle.

When to use it

During week 4 of the project timeline.

Where to use it

Microsoft Power Platform Developer agile sprints and coursework milestones.

Real use example

Team demo shows the Audit report view to the teacher.

Track: Project-Deliverables

Chapter 6: Final Deliverables and Review [Intermediate]

Chapter focus: Final Deliverables and Review** *(Level: Intermediate)

Submit all final deliverables: App + flow exports; Teams screenshot; Audit view screenshot. Skills demonstrated: Power Automate, Approvals, Teams. Prepare a 5-minute walkthrough video and README for CodeQuest teacher marking.

Code Reference:

Deliverable: App + flow exports
Deliverable: Teams screenshot
Deliverable: Audit view screenshot

What it shows: Final checklist ensures nothing is missing at submission.

Topic guide

What it actually is

Deliverable review confirms end-to-end project completion.

When to use it

Before deadline and teacher review.

Where to use it

CodeQuest project gallery and interviews.

Real use example

A student submits App + flow exports and passes the rubric.
