

Project Report: ITSM Incident Management Setup - ServiceNow Developer / Administrator

Written by Gagan Pasupuleti

Family:	ServiceNow Developer / Administrator
Level:	Beginner
Chapters:	6
Source:	CodeQuest project specification (official docs + industry patterns)

Summary

Configure incident table, assignment groups, SLAs, and email-to-incident on Personal Developer Instance.

Chapters

Track: Project-Intro

Chapter 1: Project Overview [Beginner]

Chapter focus: Project Overview *(Level: Beginner)**

ITSM Incident Management Setup is a beginner-level end-to-end project for ServiceNow Developer / Administrator. Duration: 2-3 weeks. Configure incident table, assignment groups, SLAs, and email-to-incident on Personal Developer Instance. Tools: ServiceNow PDI, ITSM module.**

Code Reference:

```
Objective: Configure assignment groups
Objective: Set SLA definitions
Objective: Email-to-incident inbound action
Objective: Create 5 test incidents
```

What it shows: Lists measurable outcomes before you start building.

Topic guide

What it actually is

A project overview defines scope, tools, and success criteria.

When to use it

At project kickoff.

Where to use it

ServiceNow Developer / Administrator portfolios and CodeQuest project submissions.

Real use example

A candidate lists this project on a ServiceNow Developer / Administrator resume with a demo link.

Track: Project-Phase

Chapter 2: Phase: Groups [Beginner]

Chapter focus: Phase: Groups** *(Level: Beginner)

Assignment groups + roles. Complete these tasks: Service Desk; Network Team. Deliverable for this phase: Group structure.

Code Reference:

- [] Service Desk
- [] Network Team

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Groups is one step in the full project lifecycle.

When to use it

During week 1 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Group structure to the teacher.

Chapter 3: Phase: SLA [Beginner]

Chapter focus: Phase: SLA** *(Level: Beginner)

Response + resolution SLAs. Complete these tasks: P1 1hr; P3 8hr. Deliverable for this phase: SLA records active.

Code Reference:

- [] P1 1hr
- [] P3 8hr

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase SLA is one step in the full project lifecycle.

When to use it

During week 2 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the SLA records active to the teacher.

Chapter 4: Phase: Email [Beginner]**Chapter focus: Phase: Email** *(Level: Beginner)**

Inbound email action. Complete these tasks: Parse subject/body; Auto-assign. Deliverable for this phase: Email creates incident demo.

Code Reference:

- [] Parse subject/body
- [] Auto-assign

What it shows: Checklist format helps track phase completion.

Topic guide**What it actually is**

Phase Email is one step in the full project lifecycle.

When to use it

During week 3 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Email creates incident demo to the teacher.

Chapter 5: Phase: Test [Beginner]**Chapter focus: Phase: Test** *(Level: Beginner)**

5 incident scenarios. Complete these tasks: Assign; Resolve; Close. Deliverable for this phase: Test incident screenshots.

Code Reference:

- [] Assign
- [] Resolve
- [] Close

What it shows: Checklist format helps track phase completion.

Topic guide

What it actually is

Phase Test is one step in the full project lifecycle.

When to use it

During week 4 of the project timeline.

Where to use it

ServiceNow Developer / Administrator agile sprints and coursework milestones.

Real use example

Team demo shows the Test incident screenshots to the teacher.

Track: Project-Deliverables

Chapter 6: Final Deliverables and Review [Beginner]

Chapter focus: Final Deliverables and Review** *(Level: Beginner)

Submit all final deliverables: PDI config export; SLA doc; Test screenshots. Skills demonstrated: ITSM, SLA, Configuration. Prepare a 5-minute walkthrough video and README for CodeQuest teacher marking.

Code Reference:

Deliverable: PDI config export
Deliverable: SLA doc
Deliverable: Test screenshots

What it shows: Final checklist ensures nothing is missing at submission.

Topic guide

What it actually is

Deliverable review confirms end-to-end project completion.

When to use it

Before deadline and teacher review.

Where to use it

CodeQuest project gallery and interviews.

Real use example

A student submits PDI config export and passes the rubric.
